

MEMORANDUM

To: Board of Directors
From: Gary B. O'Connell, Executive Director
Date: May 13, 2010
Re: Map of New Projects Underway and Planned - Informational
cc: James M. Bowling, IV

Please find attached a copy of a map of Albemarle County that shows the ACSA projects and their locations. The projects that are listed come straight from the CIP sheet that the ACSA Board receives each month. It is done by Magisterial Districts, and the darker shading shows the ACSA Jurisdictional Area – our water and sewer service areas. I found this helpful in understanding the projects and their geographic location, and thought it might be useful to our Board. I think it quickly shows the number of projects that we have ongoing, and in how many different locations. This helps to understand the complexity of the logistics involved in managing this range of projects in so many different parts of a huge county area.

Board Action

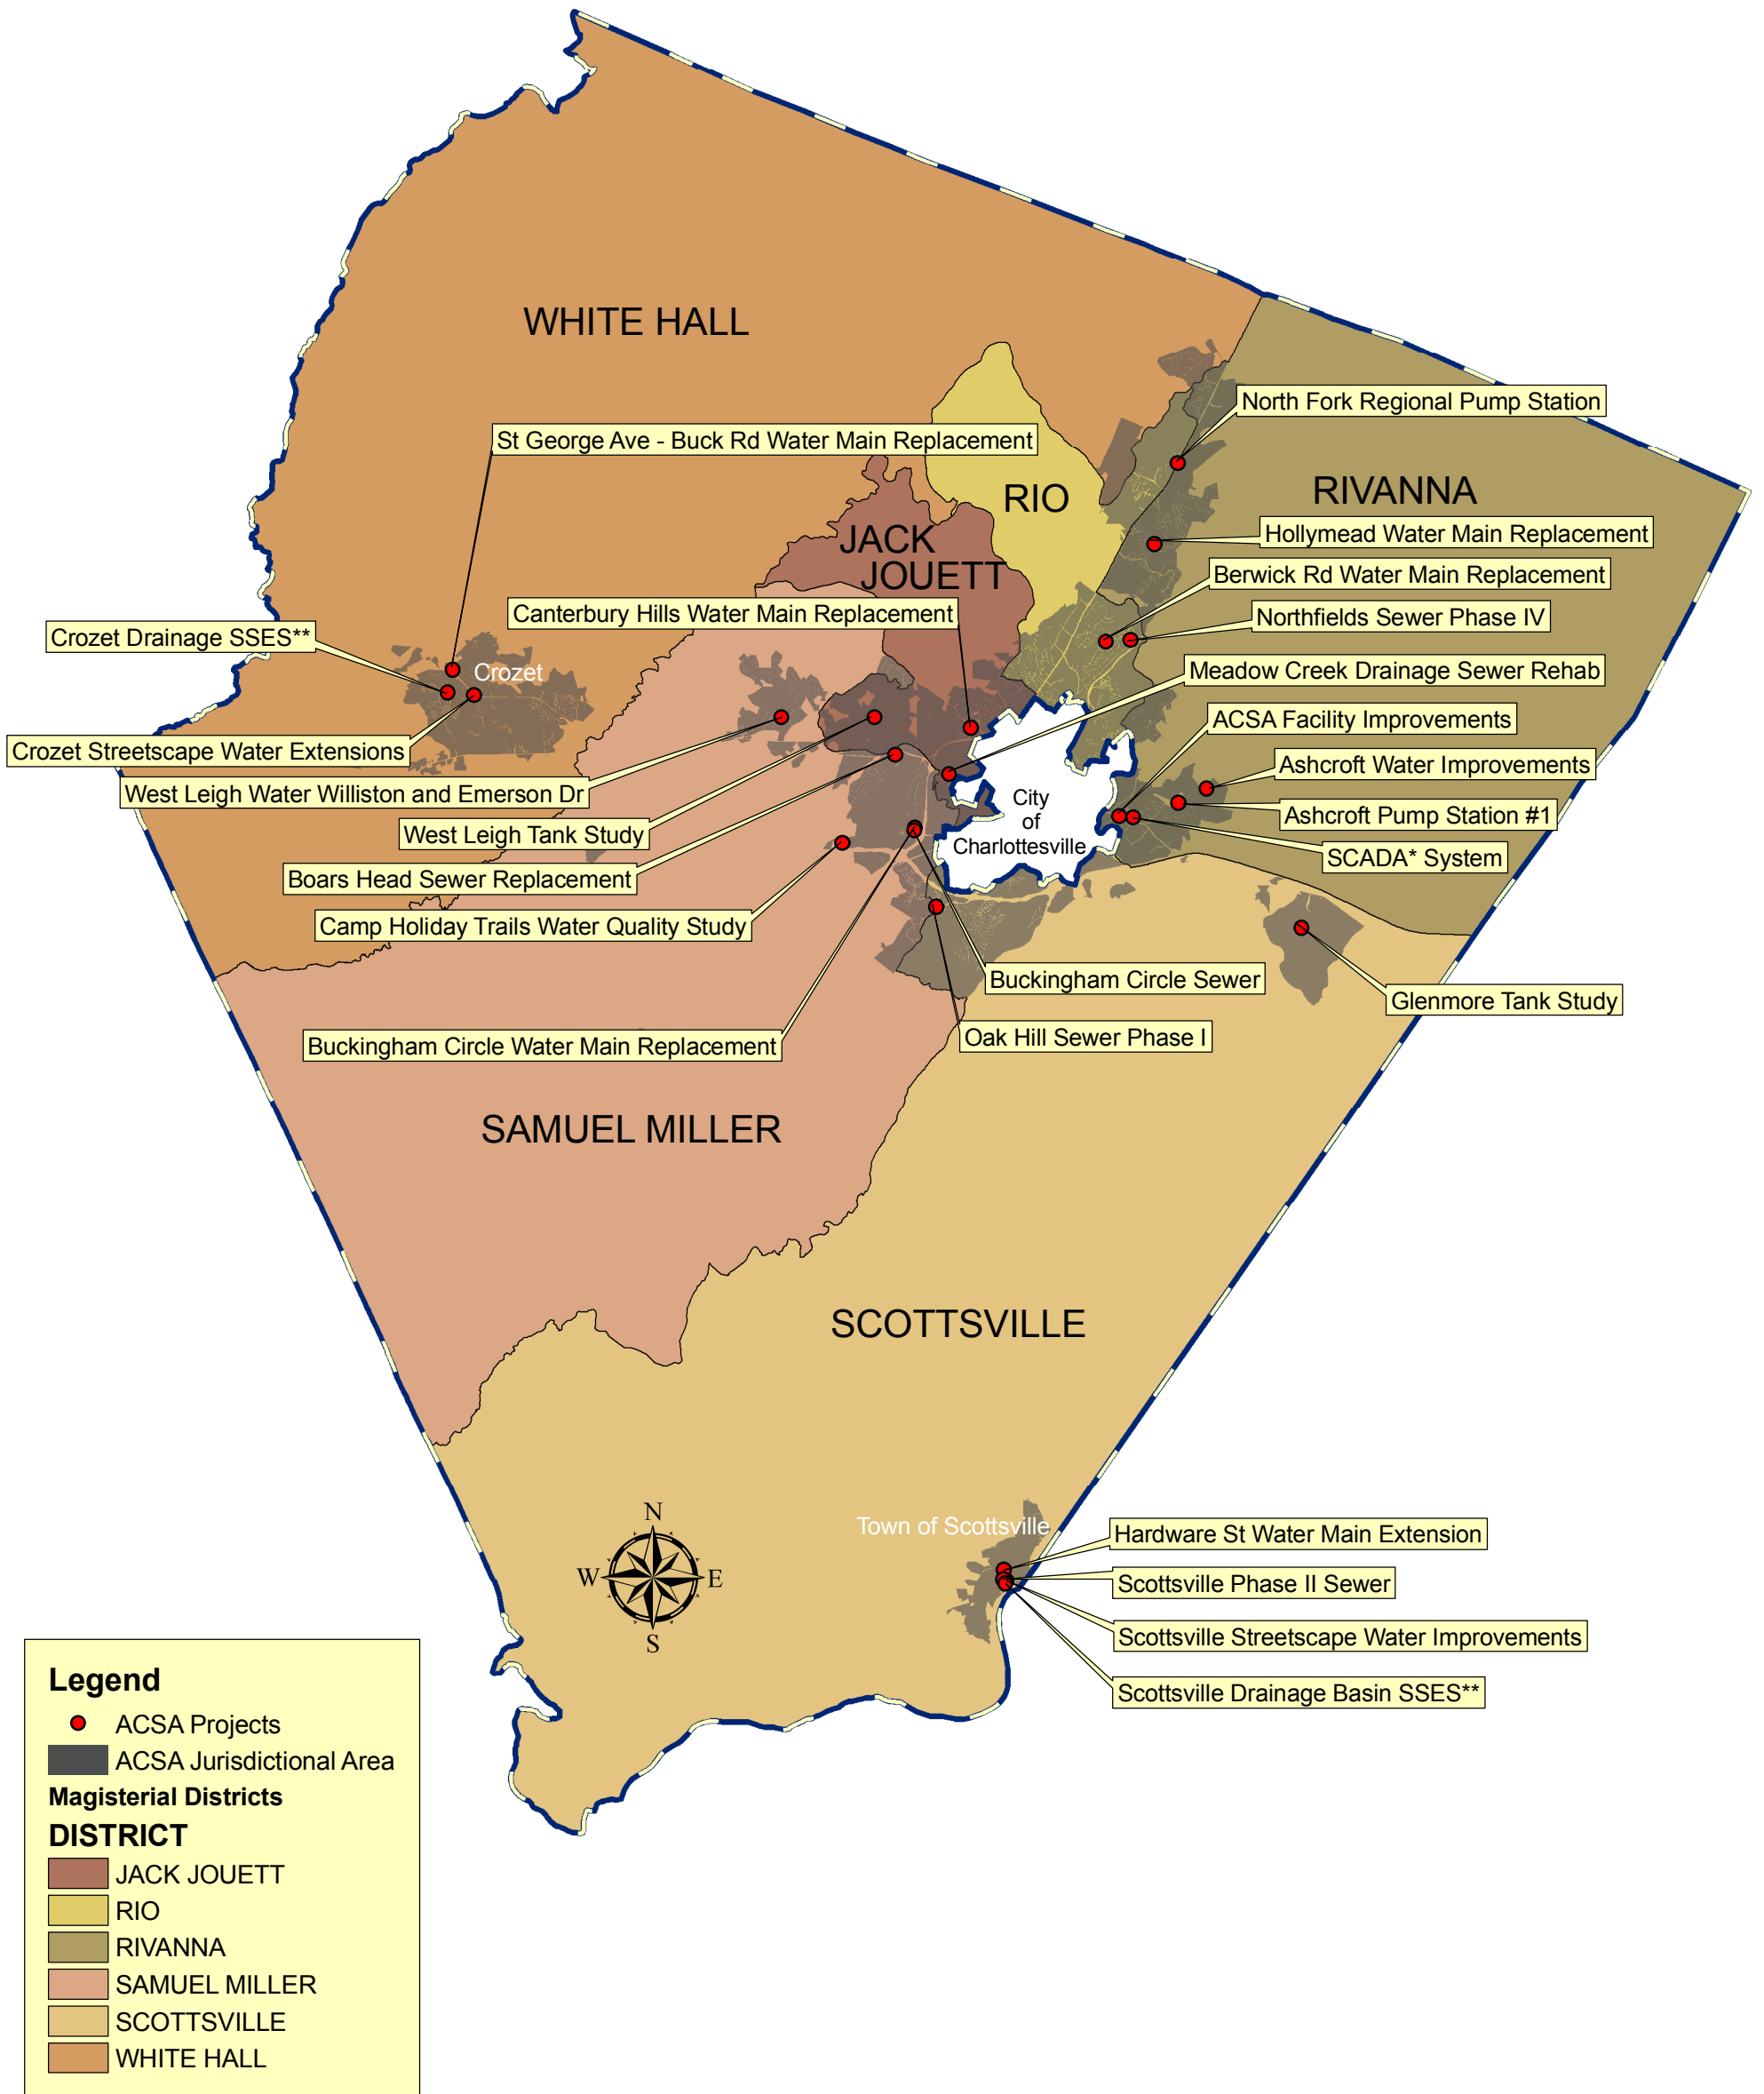

No Action Required. There is really not much discussion as this map shows currently ongoing or planned (approved) capital projects.

Attachment: Map, ACSA Capital Improvements Projects by District
